TRANSFER PUMP

Safe and sound pumping with the TRANSFER PUMP by BAKON

The TRANSFER PUMP is a unique mobile system designed for pumping various types of product - without damage or loss of structure - from one mixing bowl into another or into a hopper of a depositing machine.

Laborious pouring is now a thing of the past. Small size, big help! The TRANSFER PUMP can be used anywhere, is ready for use within minutes and is very suitable to connect to a BAKON Multi Depositor, Gearwheel Depositor or Piston Depositor.

Of course customized solutions are possible!

Scan the QR code to see the pictures or watch the video!

Through energy-saving measures, such as dimensioning of electrical power and - where possible - use of recyclable materials, BAKON commits to dealing responsibly with the environment.

TRANSFER PUMP

BAKON designs and manufactures standardized and customized depositing, spraying and cutting machines as well as production lines for efficient and high-volume processing of pastry products. BAKON stands for advanced technology and reliability.

The product to be pumped is transferred from a mixing bowl into the hopper of a filling or depositing machine. This is done without damaging or affecting the texture, consistency or appearance of the products.

Insert the suction tube in the reservoir and start the pump. The pump can be switched on manually or automatically when using a level sensor in the hopper of the depositor.

Stand-alone machine

- Supplied on a movable C-frame with suction pipe
- Pneumatic lifting system
- Quick connectors for the compressed air connections
- Suction and transport pipe are easily to (dis)connect for cleaning
- Cleaning tool is delivered with the machine to empty the pipes and make cleaning easier (optional for the TRANSFER PUMP)
- Complete stainless steel and other non-corroding material

The TRANSFER PUMP is highly suitable for many types of product, such as fruit fillings, fillings containing pieces of fruit e.g. apple, apricot or whole cherries, but also creams, cake batters, muffin batters, nut mixes etc.

INDUSTRIAL TRANSFER PUMP

TRANSFER PUMP

INDUSTRIAL TRANSFER PUMP

- Dimensions (L x W x H): 1225 x 1300 x 2000-2900 mm
- Lifting height: 900 mm
- Capacity: Up to 48 ltr/min
- Container size: Up to 890 mm high and a diameter up to 1000 mm

TRANSFER PUMP

- Dimensions (L x W x H): 650 x 1000 x 2200-2900 mm
- Lifting height: 700 mm
- Capacity: Up to 36 ltr/min

A Infinitely adjustable in height

B Adjustable in height

A Adjustable lifting height by pneumatic air cylinder.

O Outlet pipe can be replaced by an outlet hose.

O Level sensor inside the bowl, to prevent low level or overflowing.

O A bracket on the suction pipe prevents the pump from vacuuming.

O Connect the TRANSFER PUMP to easily fill the hopper of a BD9 Depositor, Gearwheel Depositor or Piston Depositor.
